

## Лабораторная работа № 4

Выполнили студенты: Биктимирова Азалия и Халилов Рафаэль

Начинаем инициализации проекта в git. Добавляем имя пользователя и e-mail.

```
MINGW64~/c/Users/rafay/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject

rafay@CinaBon-bon MINGW64 ~/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject
$ git init
Initialized empty Git repository in C:/Users/rafay/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject/.git/

rafay@CinaBon-bon MINGW64 ~/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject (master)
$ git config --global user.name "Cinnabon-bonn"

$ git config --global user.email "rafayel7302@gmail.com"
```

Далее добавляем файл, который нужно закоммитить. Делаем commit, и проверяем статус.

```
rafay@CinaBon-bon MINGW64 ~/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject (master)
$ git add LeCroissant.py

rafay@CinaBon-bon MINGW64 ~/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject (master)
$ git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
    new file:   LeCroissant.py

Также в папке проекта появилась папка .git, в котором хранятся файлы для функционирования git

| Name   | Date modified      | Type               | Size |

Создаем ssh ключ для того, чтобы в будущем было легче связать локальный репозиторий с основным в github.

```

Добавляем файлы из локального репозитория в github

```
rafay@CinaBon-bon MINGW64 ~/OneDrive/Desktop/Random things/Проектирование/ЛБ4/LeCroissantProject (main)
$ git remote add origin git@github.com:Bon-bonn/LeCroissant.git

Добавляем также второго пользователя. Для этого нужно было отправить приглашение второму пользователю, а второй пользователь в свою очередь должен был принять приглашение. После чего второй пользователь был добавлен в проект.

Второй пользователь создал новую ветку, после чего у первого пользователя появилось такое сообщение:

Второй пользователь отправил заявку на слияние веток с основной веткой

Owner ...

When I write to the bot, he answers me, but it happens only once. So, what should I add to the code if I want it to answer for every question I ask?

Cinabon-bonn commented 20 minutes ago

Collaborator ...

Just put to the end of the code this: `bot.polling(none_stop=True, interval=0)`

## Bot can't read the token #3

I have a problem with token. I mean, I tried to paste it in format "%someToken%", but it can't read I think

Bon-bonn commented 29 minutes ago

Owner ...

You're right. The bot just can't read token. So, try to paste token with this format "SomeToken" and don't forget about "()". So the full sentence is: TeleBot("PastHereToken");

I can't name the bot, the name is already exist, so how should I name it? I tried to name it "Le croissant"

Cinabon-bonn commented 36 minutes ago

Collaborator ...

Hey, let's just name it "Monsieur Croissant" in telegram!
